Diêm Đăng Huy

Unity Developer

Bắc Từ Liêm, Hà Nội 0344290482 diemdanghuyfbi@gmail.com Portfolio: diemdanghuy.github.io/portfolio

OBJECTIVE

Unity Developer with 3+ years of experience developing mobile and web games using Unity and C#. Experienced in gameplay programming, Firebase, PlayFab, SDK integration, performance optimization, and Unity Editor Tools development.
Strong understanding of OOP, SOLID principles, Design Patterns, and data-driven architecture using ScriptableObject and JSON.
Seeking to contribute to a professional game development team while continuing to grow in scalable architecture and advanced Unity systems.

TECHNICAL SKILLS

Programming	C#, OOP, SOLID Principles, Design Patterns
Unity	Unity Engine, ScriptableObject, Addressable, Object Pooling, State Machine, Unity Editor Tools, UI System, Animation System, Performance Profiling
Backend & Services	Firebase, PlayFab, REST API, JSON
Platforms	Android, iOS, WebGL
Tools	GitHub, GitLab, Trello

WORK EXPERIENCE

WinterSun 2/2024 - 5/2026

Unity Developer (Junior)

- Developed and maintained mobile and web games using Unity and C#.
- Integrated Firebase services including Authentication, Analytics, and Remote Config.
- Integrated third-party SDKs for monetization, analytics, and game services.
- Worked with PlayFab for player data management and online features.
- Designed data-driven game systems using ScriptableObject and JSON.
- Implemented complete game features from requirement analysis to testing and optimization.
- Applied Design Patterns including Singleton, Factory, Event System, Object Pooling, and State Machine.
- Developed custom Unity Editor Tools to support Game Designers in level creation and content management.
- Built and deployed games for Android, iOS, and WebGL platforms.
- Participated in sprint planning and task estimation.
- Identified and resolved performance bottlenecks using Unity Profiler, reducing CPU spikes and improving frame stability during gameplay.
- Implemented Addressables system for efficient asset loading and memory optimization in mobile games.

DKTech

2/2023 - 1/2024

Unity Developer (Fresher)

- Developed casual and puzzle games using Unity 2D.
- Created Playable Ads using Cocos Creator.
- Built and maintained Android game releases.
- Collaborated with designers and artists to deliver game features.
- Developed gameplay systems and UI features.

Weup Studio Game

6/2022 - 1/2023

Unity Developer (Intern)

- Developed mini games using Unity 3D.
- Implemented gameplay mechanics for Hyper Casual projects.
- Developed gameplay systems and UI features.

FEATURED PROJECTS

Cờ Tướng Online

-

Technologies: Unity, C#, REST API, Backend Services, Addressable

Portfolio: diemdanghuy.github.io/portfolio

• Developed core online gameplay systems and game flow using Unity and C#.

• Integrated REST API for player data management, authentication, and game services.

• Implemented online features including ranking, user profile, and matchmaking systems.

• Worked with backend services to synchronize and manage game data.

• Built and deployed WebGL/mobile builds for production testing and release.

Tile Match 2D

-

Technologies: Unity, C#, ScriptableObject, JSON

Portfolio: diemdanghuy.github.io/portfolio

• Developed core gameplay systems and level progression mechanics for a 2D puzzle game.

• Designed data-driven architecture using ScriptableObject and JSON for scalable level design.

• Developed custom Unity Editor tools to support Game Designers in level creation and balancing.

• Implemented game flow, UI systems, and level configuration pipeline.

• Optimized performance and memory usage for mobile devices.

EDUCATION

Hanoi University of Industry

2018 - 2022

Information Technology

Graduation project: Make mini game Plants vs Zombies
